

# Quality Policy

Ingevity's purpose is to improve the world through innovations that purify, protect and enhance. We do this by providing industrial, oilfield, pavement, and carbon technology products and services to our customers that anticipate their needs and exceed their expectations.

We strive to be our customers' technology partner of choice. We achieve this by engaging our employees, driving process and product innovations, setting and meeting measurable objectives, and continually improving our operations, our business, and the effectiveness of our quality management system.

By bringing together our high performing people, products and processes, we are committed to excellence in everything that we do and routinely strive to perform at the highest levels.

A handwritten signature in black ink, reading "John C. Fortson". The signature is written in a cursive style with a large initial "J" and a long, sweeping underline.

John Fortson, Chief Executive Officer
