

U.K. Covid-19 Risk Assessment

Ingevity's Warrington facility has implemented a site-wide Covid-19 Risk Assessment.

This top level visualisation of the assessment identifies the six key barriers and control measures to reduce the spread of Covid-19 infection. Prior to visiting the site, you must complete a Covid-19 site induction training package, where arrangements for managing the Covid-19 risk will be explained in more detail.

The full assessment is available upon request by contacting gary.rorke@ingevity.com.
